

- Infrared remote control
- Control shades together or independently.....you choose
- Techniku® controller
- Available for both half circle (24" to 144" diameter) and quarter circle (12" to 72" rad.) systems
- Quiet operation
- Discreet power, you hardly know it is there
- Automatic limits, no need for adjustments

The ADJUST-A-VIEW® motorization is a great option for a great product. Engineered to meet your needs, with the touch of a button you are in control of your shade position.

You choose as much light, privacy or view as you want.....when you want it by adjusting either shade to: open, closed or any position in-between, all with the touch of a button on the remote control.

With ADJUST-A-VIEW® motorization you can now put treatments on your hard-to-reach arched windows, like those in high foyers and other locations where manual pull cords are not practical.

To learn more, contact your local ADJUST-A-VIEW® dealer or visit www.adjustaview.com.
